

Kozarska Dubica signed a cooperation agreement with the consulting firm "International bridge Consulting" (IBC) for the construction of the business zone " Lipova greda" in July 2010.

"The Business Zone is located on both sides along the main road Kozarska Dubica - Gradiska. It has a total surface area of 68 hectares, of which 47 ha is planned for production activities, and the remaining 21 acres on the other side of the highway is planned for trade and business. This site, located along the main road Kozarska Dubica - Gradiska, is associated with border crossing Donja Gradina - Jasenovac about 10 km from the industrial/commercial zone. Zagreb-Belgrade highway is only 20 km away and connects the zone with all major centers in the region and in Europe (Zagreb 100km, 324km Belgrade, Ljubljana 267 km).

The proximity to the river Sava makes the location more interesting because of the possibility for work relations in Europe. The industrial zone is envisaged to flourish with industrial plants small and medium-sized manufacturing and processing activities, as well as for the developing all kinds of crafts and service facilities, refrigerators and storage for various purposes. For investors who intend to hire up to 50 workers there will be a discount of 10 percent and up to 40 percent for those who hire more than 150 employees.
